FAMILY SAFETY NET | **CHILDREN AND THE INTERNET
SMART FROM THE BEGINNING**

**Dear students,
Another school year is here.
Get ready to learn important and
useful things and don't forget to
have fun! Good luck!**

Did you know that the process of learning never ends? We learn while playing, reading, drawing, listening to music, talking to other kids and adults... Sometimes, we can do all this on the Internet.

Perhaps you want to find information on how people lived in caves, what makes a rainbow appear or how the Great Pyramids were built. You can do it quickly and easily! Isn't it nice when you need just a click or two to get your favourite music, book or instructions on how to make an experiment at home?

**Remember!
The Internet is also
hiding various
dangerous things!**

You have to be careful and smart when using it. Explore it together with adults. Talk to them and always report if something online makes you frightened or upset.

**Don't stay too long in front
of the screen!
Save some time to play
outside and hang
out with your friends.
Don't let the Internet
be your master. Make it
your Learning and
Game Assistant!**
